## CASTELVECCHIO

FRIULI VENEZIA-GIULIA, ITALY

The portion of the Karst where the Castelvechio Vineyards are located was a theatre of battle of World War I, which took these lands away from the Hapsburg Empire, including the villa itself, which was the headquarters of the Italian command for part of the war. In the '80s, the first vineyards were planted, and the property now extends to 120 hectares. The decisive element for the success of grape cultivation then, as it is now, was water availability. Thanks, in fact, to the typical phenomena of this karst land, below the challenging rocky surface lie natural basins in which water collects and is held. From these wells, a drip-irrigation piping system extends over countless kilometers, bringing the life-giving water to the vines' roots.

## VINCENT GIRARDIN

BURGUNDY, FRANCE

In 1980, at 19, Vincent Girardin, the son of a family of winegrowers based in Santenay since the 17th century, decided to strike out on his own and began producing wine from two hectares of vines he had inherited from his parents. In the early 2000s, with the arrival of Eric Germain as winemaker, a profound change began to take place. Vincent decided to concentrate on the essence of the wines: the expression of the great terroirs of Burgundy. A new purity of style was born, which has now been acknowledged by all winemakers. In 2012, Vincent Girardin sold his operation to a long-standing partner of the Maison, Mr. Nié, President of the Compagnie des Vins d'Autrefois in Beaune.
